Sea Change wine are passionate about two things: protecting marine environments from plastic pollution and great tasting wine. We believe that everyone has a role to play in tackling the problem of plastics in our oceans. For every bottle sold, a donation is made to marine conservation charities who are actively fighting plastic pollution. Packaging has been minimised on every bottle to reduce waste: natural corks made using renewable energy are used, and we've removed the unnecessary plastic wrap around the cork. The labels are made partially from grape waste and lovingly hand drawn by their in house designers. Take a closer look and you'll see the marine animals represent the problem: they're filled with plastic!
